題目(和文)	ウィッテンゼータ関数とウィッテンL-関数について
Title(English)	On Witten zeta functions and Witten L-functions
著者(和文)	閔正媛
Author(English)	Jeongwon Min
出典(和文)	学位:博士(理学), 学位授与機関:東京工業大学, 報告番号:甲第10051号, 授与年月日:2016年3月26日, 学位の種別:課程博士, 審査員:黒川 信重,内藤 聰,加藤 文元,水本 信一郎,鈴木 正俊
Citation(English)	Degree:Doctor (Science), Conferring organization: Tokyo Institute of Technology, Report number:甲第10051号, Conferred date:2016/3/26, Degree Type:Course doctor, Examiner:,,,
学位種別(和文)	博士論文
Category(English)	Doctoral Thesis
種別(和文)	要約
Type(English)	Outline

We study Witten zeta functions and Witten L -functions. First, we calculate zeros and special values for Witten zeta functions and Witten L -functions for $SU(2)$ and $SU(3)$. Next, we investigate the relation between the product of conjugacy classes of $SU(2)$ and vanishing of Witten L -functions for $SU(2)$. Furthermore, we discuss the mean values of the Witten L -function for $SU(2)$.

We also consider Witten zeta functions and Witten L-functions for some finite groups. We study the order of zeros of Witten L-functions for the symmetric group S_n at $s = -2$. Finally, we introduce unified Witten zeta functions for finite groups. We give a “generalization” of the character table sum studied by Solomon (1961).
