

論文 / 著書情報
Article / Book Information

題目(和文)	層状物質の表面における自己組織化ペプチドの分子認識
Title(English)	Molecular recognition of self-assembled peptides on layered materials
著者(和文)	孫林豪
Author(English)	Linhao Sun
出典(和文)	学位:博士(工学), 学位授与機関:東京工業大学, 報告番号:甲第10370号, 授与年月日:2016年12月31日, 学位の種別:課程博士, 審査員:早水 裕平,森 健彦,バツハ マーティン,松本 英俊,道信 剛志
Citation(English)	Degree:Doctor (Engineering), Conferring organization: Tokyo Institute of Technology, Report number:甲第10370号, Conferred date:2016/12/31, Degree Type:Course doctor, Examiner:,,,,,
学位種別(和文)	博士論文
Category(English)	Doctoral Thesis
種別(和文)	要約
Type(English)	Outline

Table of contents

Author's declaration	III
Abstract.....	IV
Acknowledgements	V
Abbreviation list.....	VI
Table of contents.....	VII
Chapter 1 Introduction of molecular self-assembly on solid surfaces	
1.1 Summary the self-assembly concept and process.....	1
1.1.1 Concept of self-assembly.....	1
1.1.2 Examples of self-assembly.....	1
1.2 The importance of self-assembly.....	4
1.3 Summary the works about self-assembled behavior of peptides at water/solid interface.....	6
1.4 The approach for characterizing of self-assembled peptides at interface	16
1.5 The properties of MoS ₂ and synthesis of CVD MoS ₂	20
1.6 The motivation of my thesis.....	27
1.7 Reference	28
Chapter 2 Self-assembly of M6 and chiral M6 peptides on MoS₂ and graphene	
2.1 Introduction.....	32
2.2 Motivation.....	33
2.3 Experiment and approach.....	33
2.3.1 Peptides information.....	33

2.3.2 CVD MoS ₂ synthesis.....	33
2.3.3 AFM measurement.....	34
2.4 Results and Discussion.....	35
2.4.1 Morphology of M6 peptides on bulk MoS ₂ with different concentration	35
2.4.2 Crystallographic orientation of M6 on CVD MoS ₂	37
2.4.3 The effect of concentration on crystallographic orientation of M6 peptide.....	40
2.4.4 The effect of temperature on crystallographic orientation of M6 peptide.....	40
2.4.5 The chirality recognition of Chiral M6 on CVD MoS ₂	42
2.4.6 Lattice matching of self-assembled M6 peptides on CVD MoS ₂	45
2.4.7 Another possible mechanism for gas molecule to guild self-assembly of peptides	49
2.4.8 Morphology of M6 on graphene with different concentration	51
2.4.9 Crystallographic orientation of M6 on graphene with specific angle	52
2.5 Conclusion	55
2.6 Reference	56

Chapter 3 Self-assembly of FI, FI (k) peptides on MoS₂

3.1 introduction.....	58
3.2 Motivation of this work.....	58
3.3 Experiment and approach.....	58
3.3.1 Peptides information	58
3.3.2 CD measurement.....	59
3.4 Results and Discussion.....	60
3.4.1 Morphology of FI and FI (k) peptides on bulk MoS ₂ with different concentration.....	60
3.4.2 Crystallographic orientation and chirality recognition of FI on CVD MoS ₂	63
3.4.3 A model to explain the crystallographic orientation of FI peptides	64
3.5 Conclusion.....	66
3.6 Reference	67

Chapter 4 Self-assembly of Y(GA)_nY peptides on MoS₂ and Graphene

4.1 Experiment and approach.....	69
4.1.1 Peptides information about Y(GA) _n Y.....	69
4.2 Results and Discussion.....	70
4.2.1 Morphology of Y (GA) _n Y peptides on bulk MoS ₂ with different concentration	70
4.2.2 CD and FTIR to characterize the structure of Y (GA) _n Y solution	72
4.2.3 Adjustment of crystallographic orientation by Y (GA) _n Y peptides on CVD MoS ₂	74

4.2.4 Periodicity analysis of self-assembled Y (GA) _n Y peptides	76
4.2.5 The effect of inorganic salts on morphology of Y (GA) ₃ Y peptides on bulk MoS ₂	79
4.2.6 The effect of temperature on morphology of Y (GA) ₃ Y peptides on bulk MoS ₂	83
4.2.7 The crystallographic orientation of Y(GA) _n Y peptides on graphene with specific angle	88
4.3 Conclusion	92
4.4 Reference	93

Chapter 5 Self-assembly of LEY and LKY peptides on graphite and MoS₂

5.1 Experiment and approach	94
5.1.1 Peptides information	94
5.2 Results and Discussion	94
5.2.1 Morphology of LEY and LKY peptides on bulk MoS ₂ with different concentration	94
5.2.2 Crystallographic orientation of LEY peptides on CVD MoS ₂	98
5.2.3 The effect of inorganic salts on morphology of LEY and LKY peptides on bulk MoS ₂	98
5.2.4 The effect of temperature on morphology of LEY and LKY peptides on bulk MoS ₂	100
5.2.5 The stability of LEY and LKY peptides on MoS ₂ during	

water incubation.....	101
5.3 Conclusion.....	105
5.4 Reference.....	106

Chapter 6 Adjustment of self-assembly of one peptide by another patterned peptides on layered materials

6.1 Motivation of this work.....	107
6.2 Experiment and approach.....	108
6.2.1 Preparation about Graphite samples.....	108
6.2.2 Peptides information about LEY, M6, M6-D and M6+D, M8	109
6.3 Results and Discussion.....	109
6.3.1 The sequential assembly of GrBP5 peptides and LEY peptides on graphite.....	109
6.3.2 The sequential assembly of LKY and M8 peptides on patterned structure of LEY peptides.....	111
6.3.3 Control the orientation of M6, M6-D and M6+D peptides by patterned LEY peptide on graphite.....	113
6.3.4 Control growth of one peptide by another patterned peptide	115
6.4 Conclusion.....	116

Chapter 7 Conclusion and future work

7.1 General conclusion.....	117
-----------------------------	-----

7.2 future work.....	118
7.3 Publications and conferences.....	120
Appendix.....	121
