| 題目(和文) | 原油生産井における生物学的サワー化と微生物腐食を制御するための硝酸添加に関する研究 |
| Title(English) | Study of nitrate injection to control biological souring and microbiologically influenced corrosion in crude-oil well |
| 著者(和文) | Kamarisima |
| Author(English) | Kamarisima |
| 出典(和文) | 学位:博士(工学), 学位授与機関:東京工業大学, 報告番号:甲第10972号, 授与年月日:2018年9月20日, 学位の種別:課程博士, 審査員:丹治 保典,中村 聡,和地 正明,山本 直之,八波 利恵 |
| Citation(English) | Degree:Doctor (Engineering), Conferring organization: Tokyo Institute of Technology, Report number:甲第10972号, Conferred date:2018/9/20, Degree Type:Course doctor, Examiner:,,,, |
| 学位種別(和文) | 博士論文 |
| Category(English) | Doctoral Thesis |
| 種別(和文) | 要約 |
| Type(English) | Outline |

Doctoral Thesis Outline

Table of Contents

List of Figures

List of Table

Chapter 1. General Introduction

- 1.1 Reservoir souring
- 1.2 Sulfate reduction by SRB
- 1.3 Iron corrosion by SRB
- 1.4 Mitigation of reservoir souring and MIC by SRB
- 1.5 Dissertation outline

Chapter 2. The addition of nitrate to control biological souring

- 2.1 Introduction
- 2.2 Materials and methods
 - 2.2.1 Artificial Souring Experiment
 - 2.2.2 Chemical analysis
 - 2.2.3 Bacterial analysis
- 2.3 Results and Discussion
 - 2.3.1 The presence of nitrate- and SRB contribute to ineffectiveness souring control by nitrate injection
 - 2.3.2 The utilization of aromatic hydrocarbon by nitrate- and sulfate-reducing bacteria in single and multiple nitrate injection for souring control
 - 2.3.3 Summary

Chapter 3. The effect of nitrate addition to MIC

- 3.1 Introduction
- 3.2 Materials and methods
 - 3.2.1 Corrosion assay experiment
 - 3.2.2 Carbon steel coupon preparation and analysis
 - 3.2.3 Chemical analysis
 - 3.2.4 Bacterial analysis
- 3.3 Results and Discussion
 - 3.3.1 Nitrate addition trigger the formation of pitting corrosion
 - 3.3.2 The contribution of surface roughness to broaden the pitting corrosion
- 3.4 Summary

Chapter 4. Characterization of two SRB YB01 and YB02 screened from Akita oilfield water

- 4.1 Introduction
- 4.2 Materials and methods
 - 4.2.1 SRB isolation
 - 4.2.2 Medium and growth condition
 - 4.2.3 Chemical analysis
 - 4.2.4 Genome sequencing and bioinformatics analysis
- 4.3 Results and discussion
 - 4.3.1 Genome features and phylogenetic analysis of two isolated strain YB01 and YB02
 - 4.3.2 Metabolic prediction of YB01 and YB02
 - 4.3.3 Biological characterization of SRB YB01 and YB02
- 4.4 Summary

Chapter 5. The contribution of SRB YB01 and YB02 to cause biological souring and MIC

- 5.1 Introduction
- 5.2 Materials and method
 - 5.2.1 Souring assay of YB02
 - 5.2.2 Corrosion assay of isolated bacteria YB01 and YB02
 - 5.2.3 Chemical, coupon, and biological analysis
- 5.3 Results and Discussion
 - 5.3.1 Artificial souring experiment with a variable source of electron donor by YB02
 - 5.3.2 The effect of nitrate addition to control MIC caused by YB01 and YB02
 - 5.3.3 The MIC activity by YB01 and YB02 under various toluene concentration
- 5.4 Summary

Chapter 6. The stress response of YB01 and YB02 against the nitrate-rich environment

- 6.1 Introduction
- 6.2 Materials and methods
 - 6.2.1 Nitrate- and nitrite reduction assay
 - 6.2.2 Transcriptome analysis
 - 6.2.3 RNA extraction and RT-PCR
- 6.3 Results and Discussion

- 6.3.1 The tolerance of YB01 and YB02 with various nitrate and nitrite concentration under limiting sulfate concentration
- 6.3.2 The evaluation of sulfate- and the nitrate-reducing ability of YB01 and YB02 on transcriptome level
- 6.4 Discussion
- 6.5 Summary

Chapter 7. Conclusion and perspective
