

論文 / 著書情報
Article / Book Information

題目(和文)	NRKの分子進化と胎盤における機能の解明
Title(English)	Placental Mammals Acquired Functional Sequences in NRK for Regulating Cell Proliferation and Apoptosis in Placenta
著者(和文)	BENILestari
Author(English)	Beni Lestari
出典(和文)	学位:博士(理学), 学位授与機関:東京工業大学, 報告番号:甲第12339号, 授与年月日:2023年3月26日, 学位の種別:課程博士, 審査員:加藤 明,岩崎 博史,田中 幹子,中戸川 仁,藤田 尚信
Citation(English)	Degree:Doctor (Science), Conferring organization: Tokyo Institute of Technology, Report number:甲第12339号, Conferred date:2023/3/26, Degree Type:Course doctor, Examiner:,,,,
学位種別(和文)	博士論文
Category(English)	Doctoral Thesis
種別(和文)	要約
Type(English)	Outline

Dissertation Outline

Cover	1
Table of Contents	2
List of Abbreviations	5
List of Publication and Conferences	8
Chapter 1 General Introduction	9
1.1 The functions, structure, and development of the placenta	10
1.2 NRK as a member of Germinal Center Kinase (GCK) subfamily IV	11
1.3 The reported roles of NRK in developmental process	12
1.4 The roles of AKT signaling in placenta development and fetal growth	13
1.5 Apoptosis events during placenta development	14
1.6 The purpose of my study	14
Chapter 2 Materials and Methods	16
2.1 Antibodies and reagents	17
2.2 Plasmids	18
2.3 Synteny and gene loci analysis	19
2.4 Tissue expression analysis	19
2.5 Exon structure analysis	19
2.6 Protein evolutionary rate analysis	20
2.7 Cell culture and transfection	21
2.8 Lentivirus production	21
2.9 Cell survival assay (WST-8 assay)	21
2.10 Cell death assay (SYTOX Green staining)	22
2.11 Immunoprecipitation and immunoblotting	22
2.12 Immunostaining	22
2.13 <i>In vitro</i> CK2 kinase assay	23
2.14 Lipid-protein overlay assay	23
2.15 Lipid binding assay	24
2.16 Animal experiment	24
2.17 LC-MS/MS analysis	25
Chapter 3 Evolutionary history of the <i>Nrk</i> Gene	26
3.1 Background: Evolution of placenta and placenta-specific genes	27
3.2 Results	28
3.2.1 Synteny and gene loci analysis of <i>Nrk</i> gene and the related proteins	28

3.2.2	Tissue expression analysis of <i>Nrk</i> gene and the related proteins	31
3.2.3	Exon structure analysis of <i>Nrk</i> gene across vertebrates	32
3.2.4	Phylogenetic analysis of the amino acid sequences of vertebrate NRK	33
3.2.5	Evolutionary pressure analysis of mouse NRK functional regions	36
3.3	Discussion	39
3.3.1	Chromosomal location of <i>Nrk</i> gene	39
3.3.2	Accelerated evolution of <i>Nrk</i> gene	39
3.3.3	Summary	40
Chapter 4 The anti-proliferative effects of NRK		41
4.1	Background: The overview of CK2-PTEN-AKT pathway	42
4.2	Results	44
4.2.1	Effects of mNRK and the related proteins on cell proliferation and AKT signaling	44
4.2.2	Ability of mNRK to bind to CK2 and the corresponding responsible regions for CK2-binding and AKT phosphorylation	45
4.2.3	Evaluation Effects of mNRK middle region binding to CK2 on AKT signaling, cell proliferation, and CK2 kinase activity	48
4.2.4	The role of CNH domain of mNRK in AKT signaling	50
4.2.5	Effects of mNRK on the CK2-PTEN-AKT pathway	52
4.3	Discussion	54
4.3.1	The roles of kinase domain, middle region, and CNH domain of mNRK in regulating AKT signaling	54
4.3.2	Molecular mechanism underlying the inhibition of AKT signaling by mNRK	56
4.3.3	Mechanism for the regulation of placental cell proliferation	56
4.3.4	Summary	57
Chapter 5 The pro-apoptotic effects of NRK		58
5.1	Background: The overview of apoptotic cell death	59
5.2	Results	61
5.2.1	The responsible region for pro-apoptotic function of mNRK	61
5.2.2	The localization of mNRK CNH domain in cells undergoing apoptosis	62
5.2.3	The molecular basis for the PM localization of mNRK CNH domain	63

5.2.4	The requirement of the polybasic clusters of the mNRK CNH domain on the pro-apoptotic function	66
5.2.5	Identification of mNRK CNH domain-binding proteins in cells undergoing apoptosis	67
5.3	Discussion	68
5.3.1	Putative molecular mechanism by which mNRK become pro-apoptotic factor by cleavage	69
5.3.2	The importance of phospholipid-binding ability of the CNH domain of mNRK in regulating apoptosis	69
5.3.3	The possible apoptotic machinery proteins downstream of mNRK	70
5.3.4	Summary	71
Chapter 6 General Discussion and Conclusion		72
6.1	Unique evolutionary history of the <i>Nrk</i> gene among placenta-specific genes	73
6.2	Unique cellular function of eutherian NRK among GCK IV members and the underlying molecular evolution	76
6.3	Physiological roles of NRK in placental development	77
6.4	Pathological roles of NRK in placental abnormality	79
6.5	Conclusion and working hypothesis	80
